Susan Howson (? -) British mathematician, the first woman to win the Adams Prize. Her research focuses primarily on elliptic curves and extending the theories of Kenkichi Iwasawa.

Howson has taught at MIT, Cambridge, Oxford and Nottingham.

Howson has <http://planetmath.org/ErdHosNumber> Erdős number 3. With Paul Balister she published an article on Nakayama's lemma for compact Λ -modules in *Asian J. Math*, while Balister co-authored a paper on Ramsey size-linear graphs with Miklós Simonovits, who co-authored with Erdős a paper regarding a graph theory limit theorem in *Studia Sci. Math. Hungar.*
