Although there is no Nobel Prize for mathematics, many mathematicians win the Nobel Prize, often in fields that rely heavily on mathematics, such as physics and economics¹.

- 1950: Bertrand Russell (literature)
- 1954: Max Born, Walther Bothe (physics)
- 1972: (economics)
- 1994: John Forbes Nash (economics)
- 2003: Clive W. J. Granger (economics)
- 2005: Robert J. Autmann, Thomas C. Schelling (economics)

¹ Alfred Nobel's will did not provide for a prize in economics. What is usually called the Nobel Prize in Economics is technically the Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel.
