Dov Tamari

Canonical name	DovTamari
Date of creation	2013-03-22 16:49:11
Last modified on	2013-03-22 16:49:11
Owner	Mravinci (12996)
Last modified by	Mravinci (12996)
Numerical id	7
Author	Mravinci (12996)
Entry type	Biography
Classification	msc 01A60

Dov Tamari (193? -) French mathematician, best known for the Tamari lattice. He earned a doctorate of science from the Université de Paris. His students include Carlton Maxson and Kevin Osondu. As of 1990, Tamari was living in New York.

Tamari has <http://planetmath.org/ErdHosNumber> Erdős number 2 because he coauthored with Abraham Ginzburg “Representation of multiplicative systems by families of binary relations” in the *Journal of the London Mathematical Society* **37** in 1962.

Search engine results for “Dov Tamari” turn up the first Chief Intelligence Officer of the Israeli Corps, who is someone other than the mathematician.
